

DIAMOND REFURBISHMENT DIAMOND TOOL

Extend the working life of your tools.

Refurbishment and regeneration of diamond segments and grinding plates for renewed use - adapted to the material and processing method.

FEWER REPLACEMENTS

The tool receives a new working life.

LESS WASTE

More reuse of material.

READY FOR WORK

Suitable for the surface and task.

How does refurbishment work?

Inspection - refurbishment - testing - reuse.

TOOL INSPECTION

Inspection of wear, diamond segments and carrier condition.

DIAMOND REFURBISHMENT

Cleaning, preparation and regeneration of the working surface.

TESTING

Verification of suitability for renewed grinding or polishing.

FROM TOOL TO SURFACE

FOR DIFFERENT MATERIALS AND APPLICATIONS

Preparation, coarse and fine grinding and polishing:

TERRAZZO

MARBLE

GRANITE

CONCRETE

SELF-LEVELLING COMPOUNDS

WET OR DRY POLISHING

We adapt the solution to the project and substrate.

We refurbish diamond tools.
We prepare them for the next job.
